# Rodless magnetic cylinder(With exactitude guide)——RMTL Series

#### Compendium of RMTL Series

### Installation and application

- 1. Dirty substances in the pipe must be eliminated before cylinder is connected with pipeline to prevent the entrance of impurities into the cylinder.
- 2. The medium used by cylinder shall be filtered to  $40\mu m$  or below.
- 3. Anti-freezing measure shall be adopted under low temperature environment to prevent moisture freezing.
- 4. If the cylinder is dismantled and stored for a long time, pay attention to conduct anti-rust treatment to the surface.

  Anti-dust caps shall be added in air inlet and outlet ports.

### Rodless magnetic cylinder(With exactitude guide)

#### Symbol

#### **Product feature**

- 1. This magnetic cylinder is basically a pneumatic rodless cylinder featuring a mobile piston fitted with annular magnets. The mobile carriage is also equipped with magnets to provide magnetic coupling (carriage/piston). The carriage slide freely along the main tube.
- 2.It is dust-proof as the isolation between the carriage and piston.
- 3.It is compact in space.
- 4. The non adjustable rubber bumpers and the adjustable pneumatic cushioning on both ends of the cylinder ensure the smooth action. If shock absorber be used, the cushioning effect is more perfection.
- 5. Double guides ensure high precision and can endure proper side load or prejudicial load.

#### **Specification**

| Bore size(mm)        | 10   | 10 16 20 25 32                        |           |            |                       |     |  |  |  |  |  |  |
|----------------------|--|---------------------------------------|-----------|------------|-----------------------|-----|--|--|--|--|--|--|
| Acting type          | Double acting                              |                                       |           |            |                       |     |  |  |  |  |  |  |
| Fluid                | Air(to be filtered by 40µm filter element) |                                       |           |            |                       |     |  |  |  |  |  |  |
| Operating pressure   | 0.2~0.7MPa(30~100psi(2.0~7bar)             |                                       |           |            |                       |     |  |  |  |  |  |  |
| Proof pressure       | 1.2MPa(175psi)(12.0bar)                    |                                       |           |            |                       |     |  |  |  |  |  |  |
| Temperature °C       | -20~70                                     |                                       |           |            |                       |     |  |  |  |  |  |  |

#### Installation and application

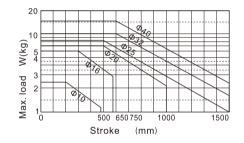

1. How to determine load

The maxi load to move must be less than the theoretical holding force.

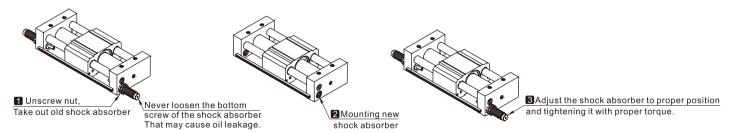

The relation between loading and stroke as below (Loading center and slide table center must be superposition)

| Bore size | Max.Load<br>W(kg) | Stroke |
|-----------|-------------------|--------|
| 10        | 2.4               | ~200mm |
| 16        | 5                 | ~300mm |
| 20        | 6                 | ~500mm |
| 25        | 8                 | ~500mm |
| 32        | 10                | ~600mm |
| 40        | 16                | ~600mm |

- 2. About shock absorber
- 2.1) Shock absorbers are consumable parts. When a decrease in energy absorption capacity is noticed, it must be replaced. Refer to the table below for shock absorber type.
- 2.2) Never loosen the bottom screw of the shock absorber. (It is not an adjustment screw.) That may cause oil leakage.
- 2.3) Refer to the table below for tightening torques of the shock absorber setting nut.

| Bore size             | 10         | 16        | 20         | 25         | 32         | 40         |
|-----------------------|------------|-----------|------------|------------|------------|------------|
| Shock absorber type   | ACA0806-1N | ACA1006-A | ACA1007-1N | ACA1412-1N | ACA2020-1N | ACA2020-1N |
| Tightening torque(Nm) | 1.67       | 1.67      | 1.67       | 3.14       | 10.80      | 10.80      |

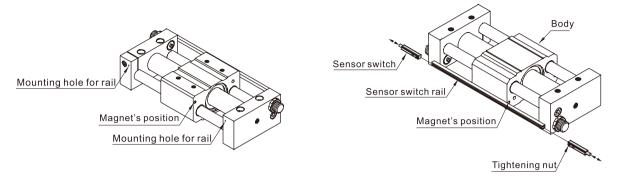

## Rodless magnetic cylinder(With exactitude guide)

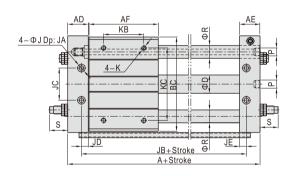

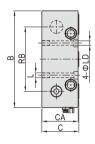

### RMTL Series

- 3. About sensor switch
- 3.1) Sensor switch only can be used for the cylinder with magnet. The magnet located the four corner of body's (refer below). The cylinder with magnet have both group mounting hole for mounting rail. please refer to below for ordering sensor switch, mounting it into the rail's groove, adjusting it to proper position, tightening it with proper torque.
